Dassault Systèmes appoints LogiCamms as first System Integrator Alliance Partner in Australia

LogiCamms Limited (ASX: **LCM**) is pleased to announce it has signed a system integrator alliance agreement with Dassault Systèmes, which will cover both enterprise technology deployments and implementation services for Dassault Systèmes' industry solution experiences based on the 3DEXPERIENCE platform.

The system integrator alliance further deepens Dassault Systèmes' successful software collaboration with LogiCamms in Australia established in 2017, which included the development of South Australia's Virtual Shipyard program for the state's defence industry and mapping of digital capability for large manufacturing projects.

Under the terms of the agreement, Dassault Systèmes and LogiCamms will establish a teaming relationship and define business processes to deliver innovative and effective solutions to their mutual customers. This marks Dassault Systèmes' first system integrator alliance in Australia and is part of the company's broader strategy to expand its footprint in Australia through system integrator alliances, where system integrator partners like LogiCamms will benefit from Dassault Systèmes' training and from potential revenues from 3DEXPERIENCE platform implementation services.

LogiCamms Interim Chief Executive, Dan Drewe said, "This is a major landmark for LogiCamms both locally and globally, as our capabilities and market leadership will be greatly enhanced with Dassault Systèmes' powerful industry solutions. We look forward to helping our customers achieve their innovation milestones through this system integrator alliance."

"We look forward to deepening our partnership with LogiCamms, which has a long-standing presence in Australia's mining, energy and life sciences industries," said Masaki Sox Konno, Managing Director, Asia Pacific South, Dassault Systèmes. Our system integrator alliance with LogiCamms will help our Australian clients to maximize their investment in the 3DEXPERIENCE platform by leveraging LogiCamms' unique expertise and experience in the country."
